

BRICKELL CITY CENTRE

Your health is important to us.

Brickell City Centre is committed to doing whatever is needed to safeguard the health of our guests, our employees, and our tenants. To that end, we are taking steps to keep everyone safe and healthy at our Centre.

Our cleaning crews are working around the clock to ensure we meet and exceed the hygiene standards established by both the Centers for Disease Control (CDC) and World Health Organization (WHO). Increased cleaning, disinfecting, and sanitizing occurs throughout the day and throughout the common areas of our property, with a particular focus on highly trafficked locations including, but not limited to:

- Centre Entrances
- Restrooms
- Trash Cans
- Elevators and Escalators
- Seating Areas
- Door Handles
- Concierge

Additionally, thorough disinfecting and sanitizing is completed during non-operating hours to prepare for business the next day.

We encourage our guests to follow the safety precautions recommended by the CDC, including:

- Frequent hand washing
- Avoiding touching your eyes, nose, and mouth
- Regular hand sanitizing, for which stations have been provided throughout the property

We urge everyone to continue following guidelines provided by the CDC and WHO. For more information about how BCC is safeguarding your health, please visit www.brickellcitycentre.com/health.

Thank you.
